The Daily Press.

HONGKONG, FEBRUARY 22ND, 1910.

JAPAN'S Colonial Policy is a subject which invites attention when we see the name of BARON GORO, formerly the Director of the Civil Administration of Formosa and now a member of the Japanese Cabinet, set down in print as the author of an article on the subject. We naturally expect to be considerably enlightened, for few men should be better qualified to write on the subject. Baron Goro has been described as the "Dr. JAMISON of Japan, minus warlike aspirations." But we are obliged to confess that the article leaves us still thirsting for the information we had hoped to find, for it abounds in vague generalities and reminds us of the epigram that "words are leaves, and where they most abound, much fruit of sense beneath is rarely found." The pith of BARON GORO's article is that Japan must plan her Colonial policy on a larger scale, and must abandon the short-sighted policy which has been adopted in regard to Formosa. As in former times, in England, the people of Japan, when Formosa was annexed, viewed the acquisition as more or less of a white elephant, a burden upon the taxpayers of the mother country which she could ill afford to bear. Doubtless, were entertained regarding the ability of the statesmen of Japan to govern distant colonies, and, in the words of the Baron, "instead of looking at the colonisation problem from a broad point of view, instead of throwing into the Colonial undertaking the adequate attention and capital absolutely necessary to bring about sufficiently great results from such an undertaking, the Government was compelled to devote its

entire attention to the plan of working out a financial and economic independence of the Colony as quickly and with as little expenditure as possible." Formosa has accordingly become financially independent of the mother country. There are people, the Baron says sarcastically, who look upon it as a great success and triumph, but he himself describes it as a foolish and short-sighted policy which he does not hesitate to call a serious blunder, and even a crime, since it creates a fatal precedent that will govern the future policy of the country in regard to all the other colonies and sections of territory open to Japanese colonial enterprise. The view of the Baron seems to be that the longer a colony is in leading strings the stronger is its attachment to the mother country likely to become, while to quickly liberate about that colony's financial independence is to invite misunderstandings and difficulties—"a simple and childlike race is driven prematurely to acquire the doctrine of personal rights which they do not and cannot understand." The result is, according to Baron Goro, that they develop, on the one hand, a resistance to the Imperial authority, and, on the other, become extremely quarrelsome and litigious among themselves, making the government of the colony extremely difficult. Baron Goro further advocates that the country's colonial policy should be "attuned to the tendencies of world-movements in the Far East," and that the nation ought to summon up its courage to lay the foundations, for at least the foundation stone, of a great future. And there the matter is left by the Baron. The full meaning of these high-sounding phrases is not explained. His Excellency does not indicate where these foundations are to be laid, but we may safely assume that Korea and Manchuria were well within the ken of the writer, who is President of the South Manchurian Railway, though in one part of the article he tells his readers that neither the people of Korea nor those of Manchuria are partial to one country; they welcome those who treat them kindly. It can at least be said that Japan has no monopoly in that respect. However, it is in the north-east of Asia that Japan must mainly count upon finding the room for her surplus population. She has long seen that some outlet is necessary to her evolution, and the prejudices against Asiatics in America and Australasia practically confine Japan's activities in this respect to Asia. Dr. DRON, the Emeritus Professor of the University of Tokyo, in a recently published book, opines that there is a splendid opening in South America for permanent Japanese settlers who agree to become citizens of those republics in which they settle, and curiously enough the author of another book which has just issued from the Press corroborates that opinion without advancing such immigration. "Peru, Ecuador, and other countries of the littoral," he says, "view with tolerance and even encourage Japanese immigration. Shiploads of Japanese are arriving at Callao. British and other sugar-producing firms are employing numbers of them, and state that they prefer them to the Indian coolies. Also, it must not be forgotten that there is a certain affinity between Asiatics and Peruvian and Mexican Indians, a heritage, perhaps, of the supposed Asiatic origin of the Aztecs and Incas. . . . but the students of race conditions would deplore to see the lands of Spanish America stuffed with Asiatics, for these lands are really the heritage of the European peoples, and only await the flow of population that war." Whether Baron Goro's ideas of a great colonial policy for Japan extends to colonisation in South America and other distant parts of the world there is nothing in his article to indicate. Territorial absorption after the British method of a century ago is no longer the easy business it was, and the area of Japan's colonial territory therefore stands little prospect of being increased unless it be by the gradual "assimilation" of Korea and Manchuria. But we miss in the article any reference to colonial aspirations by Japan, though Baron Goro is clearly persuaded that such aspirations are necessary to maintain and develop Japan's influence as a world-power.

Two men for attempting to pick pockets at the Race Course were yesterday fined \$25.

A fatality was reported from Quarry Bay dockyard on Sunday. A log of wood was being raised by a steam crane when the rope holding it snapped and the wood fell on a coolie who was working underneath. He was killed instantly.

The four men arrested in connection with the violent robbery at Gough Street last week were brought before the Magistrate yesterday and remanded. In their possession were chains and a pocket watch. The Government was compelled to devote its

A masked ball given by a number of naval officers took place in the City Hall last night.

Deep Bay was on Sunday night the scene of a daring robbery. A junk and crew were held up by robbers, who cleared most of the contents of value from the junk and disappeared.

We are asked to state that everyone will be said at St. John's Cathedral today and tomorrow, Tuesday and Wednesday, at 5.30 p.m., when addresses will be given by the Rev. Cyril Bickerton, M.A.

A batch of Chinese, numbering thirty-two were arrested by the police at 4, George's Lane for gambling. The feature of the capture was that private coolies in the service of Sir Henry May, the Postmaster General, Dr. Jordan, and Mr. Turner were caught.

Admiral Winkles has selected as his flag commander one of the boats just promoted to that rank—Commander A. T. Darley. This officer was attached to his staff in the *Sapphire* for torpedo duties during 1905-6. His flag-boat will be the same as then—Lieut. P. L. H. Noble, M.V.O.

We regret to learn from the weekly return of communicable diseases that four British and two Chinese cases of small-pox were notified in the Colony last week. The British cases are described as "modified cases." The Chinese case—one of which was an imported case—proved to be fatal.

So great is the anxiety among Chinese lest their children should be kidnapped that there have been a number of reports made to the police concerning the absence of children, and in most cases the young folks were reported found next day. One man reported his wife lost, but she also made her appearance soon after the information was lodged.

A suspicious character, who was found by the police at the Race Course in possession of two sharp blades which it was suspected were used for cutting pockets so as to obtain their contents, was brought before Mr. Wood at the Magistrate's yesterday charged with being in possession of an instrument which was intended for an unlawful purpose. He was fined \$50.

Mr. W. H. Wallace has been re-elected Chairman of the Kulsargen (Amoy) Municipal Council, and Mr. W. Kruse Vice-Chairman. The following Standing Committees of the Council have been appointed:—Watch, Mr. Lee and Mr. Monacini; Finance, Mr. Tyndrall and Mr. Wallace; Works, Mr. Fagwick and Mr. Kruse.

M. Feraudy, the well-known French aviator, and a fellow-flier were at Singapore, when the last mail left. They are going to Saigon with machines and gear, on an engagement with the local Aero Club. A Saigon paper says that the Aero Club guarantees each aviator 20,000 francs and that the performances will take place three days after the arrival of M. Feraudy.

The return of visitors to the City Hall Library and Museum for the week ending the 20th February, 1910 (exclusive of the 3 race days closed at 1 p.m.), shows that of non-Chinese there were 342 to the Library and 443 to the Museum, and of Chinese 129 to the former and 12,172 to the latter. The Library was, therefore, used by 471 persons and the Museum by 12,615.

His Excellency gave a dinner party at Government House last night, in farewell to Vice-Admiral Sir Hedworth Lambton, at which the following were present:—Captain Clinton Baker, Commander Norris, Mr. Mullen, Fleet Surgeon Beadnell, Mr. Mottson, General Broadwood, Captain Heathcote, Mr. Neville Henderson, Commodore, Mrs. and Miss Lyon, Miss Inglis, Captain and Mrs. Ryan, Commander and Mrs. Stevenson, Sir Paul Chetok, Mr. and Mrs. Gresson, Mr. and Mrs. M. Blad, Mr. and Mrs. J. K. M. Smith, Mr. and Mrs. G. Hastings, Mr. and Mrs. Montagu Ede, Mr. G. Liebert, Mr. and Mrs. Oakley, Mrs. Fox, and Captain and Mrs. Dundas.

Oil wells are to be developed in the Tabayas district of the Philippines. Referring to the departure of the experts to begin work, a Manila contemporary describes it as "the most momentous expedition that has ever left Manila." The directorate of the company is very strong, being composed of the following well-known men:—M. F. Lowenstein, of Castle Bros.-Wolf & Sons, president; B. Bruce, of Bruce & Lawrence, secretary; E. R. C. Hosty, of Castle Bros.-Wolf & Sons, treasurer; Mauro Prieto, of Gernard Cigar Factory; E. R. White, of Smith Bell & Co., Ltd.; and H. Bickett, of Bickett and Holden. The value of the machinery, pipe, foodstuffs and other supplies loaded on the *Matpid* is in excess of \$75,000. Mr. E. C. Hosty, treasurer of the company, advises that there is no more stock for sale. Mr. O. A. Leary is in charge of field operations.

THE CLASSIC DANCE IN HONGKONG.

The Theatre Royal has been engaged for Saturday night for an entertainment in which the classic dance will be the principal feature, the artists being Mlle. Mignon de Beaulieu, who has recently given these dances at Singapore and in Java. They are bare-foot dances such as Miss Maud Allen has been giving in London, and include the Salome and the statue dances of Greek and Roman sculpture. Mlle. de Beaulieu has given these performances at the Hanga Theatre in Hamburg and the Winter Gardens, Berlin, which is a guarantee of her high accomplishments.

HOW TO BE BEAUTIFUL.—Keep your complexion, Mrs. Ellen's Creme Chamois, Lait Chamois and Special Skin Tonic and Poudre Chamois will enable you to do it. Her Specialties for the skin are the study of a lifetime. A. S. Watson & Co., Ltd. Sole Agents. 445

TELEGRAMS.

(Protected by the Telegraph Message Copyright Ordinances, 1894.)

(REVISED SERVICE TO THE "HONGKONG DAILY PRESS.")

ATTEMPTED ASSASSINATION AT CAIRO.

LONDON, February 21st.

A Cairo telegram states that a Mussulman Nationalist has shot Boutros Pasha Ghaly, G.C.V.O., K.C.M.G., President of Council and Minister of Foreign Affairs. The outrage occurred outside the Foreign Department.

Five shots were fired, and three wounds are serious, but it is hoped they are not dangerous.

The assassin was arrested.

REMARKABLE SCENES IN THE REICHSTAG.

LONDON, February 21st.

There has been a remarkable debate in the Reichstag, arising out of a Socialist interpellation regarding Herr Bethmann's speech in the Diet when introducing the Franchise Bill.

The Socialists made violent attacks on the Chancellor, one threatening a revolution unless Prussia is given equal suffrage.

PARLIAMENTARY APPOINTMENTS.

LONDON, February 21st.

The Hon. E. S. Montagu has been appointed Under Secretary of State for India.

Capt. C. W. Norton has been appointed Assistant Postmaster-General. Mr. Wedgewood Benn and Mr. E. J. Soares have been chosen as Junior Lords of the Treasury.

HURRICANE IN ENGLAND.

LONDON, February 21st.

Yesterday was the fourth day of the gale which has been experienced in Great Britain.

The hurricane still continues, and the damage done in London is the greatest that has been caused for many years. Houses are unroofed, and shop-fronts blown in; havoc has been played in the parks and the roof of the National Gallery has been damaged to such an extent that the Turner Room has had to be closed.

[FROM THE MANILA "CABLENEWS"]

SALE OF PHILIPPINE SUGAR ESTATES.

WASHINGTON, February 14.

The sale by the Philippine Government of the friars' estate on Mindoro Island to the Polo syndicate has been attacked in the House of Representatives and may be investigated.

Representative Martin, of Colorado, offered a resolution calling for a congressional investigation of the deal. He said that \$5,000 acres of friar lands had been sold to the Havemeyer and sugar trust interests and he denounced the Department of Justice for sanctioning the legality of the sale.

PRESIDENT TAFT AND TRUST LEGISLATION.

WASHINGTON, February 14.

President Taft is replying to those friendly financial advisers who caution him against inviting a panic by legislation hostile to the trusts, that business must obey the law.

WEATHER REPORT.

The Hongkong Observatory yesterday issued the following report:

On the 21st at 11.55 a.m.—The barometer has risen moderately in S. Japan, and fallen slightly over E. Hokkaido.

The depression is shown over the Pacific to the N.W. of Japan.

The anti-cyclonic area remains over China to the North of the Yangtze valley, and pressure has increased slightly along the coast, except in the South.

Strong monsoon may be expected in the Formosa Channel and the N. part of the China Sea.

Hongkong rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

The forecast for the 24 hours ending at noon to-day is as follows:

N.E. wind, strong; dull, some rain. Same as No. 1. South-east of China between 10° and 15° N. Same as No. 1. South-west of China between 15° and 20° N. Same as No. 1. Hongkong and Hainan. Same as No. 1.

LICENSING BOARD.

The newly-constituted Licensing Board held its first meeting at the Legislative Council Chamber yesterday afternoon. The meeting was called for 4.30 p.m., but a difficulty was experienced in obtaining the necessary quorum of five, and it was five minutes after the advertised time before the business started. Sir Henry May presided, and the others present were: Hon. Mr. A. M. Thompson, Messrs. T. F. Hough, D. W. Craddock, A. Shelton Hooper and G. A. Woodcock (secretary).

The first application considered was from J. Kamill, residing at 37, Queen's Road Central, for a hotelkeeper's adjacent licence to sell by retail intoxicating liquors on the premises under the sign of "The Bristol Restaurant."

The Secretary intimated that there were no police objections. He then read a petition from a number of residents in the vicinity praying the Board to refuse the application on the ground that there were no less than ten full, two adjacent, and numerous other restaurants already carrying on business in Queen's Road, and the granting of further licences would be detrimental to the value of property and to the proper regulation of peace and good order. It was generally understood that more licences should be granted, and if this application was favourably considered the petitioners feared that many other restaurants would desire to obtain licences in respect of their premises.

Mr. E. A. Harding, who appeared for the applicant, put in a letter signed by numerous residents in the vicinity in favour of the application.

The applicant was called before the Board and stated that he was applying for a hotelkeeper's adjacent licence. He had six rooms for boarders, and there were two beds in each room.

Mr. Harding stated that the applicant was the nephew of Mrs. Meyer, who held a publican's licence in respect of the Colonial Hotel. The applicant had had some experience, as he had for some time assisted his uncle. The house in respect of which he applied had already had a licence. It was previously occupied by Mr. Bertelone and when he moved from this house to Charter Road he applied for a transfer of the licence to the new premises he took and those premises were now closed. Therefore, if there was any necessity for a licence before the same necessity still existed. He also wished to point out that one of the nearest fully licensed houses to this was the Travellers' Hotel, and Mrs. Oliver did not oppose the application. Again, the Colonial Hotel, which was on the side of the Market, not far from this house, also supported the application, and as the Justices would see from the list which he had put in people close to the house had signed it. The application was supported by Ruttonjee, the Oriental Brewery, and others.

The Chairman—I notice that one of the signatories is also a signatory to the petition opposing it. That is not unusual in Hongkong.

Mr. Harding—This is not granting a new licence, but renewing an old one. Therefore, I ask that the present application be granted. There is accommodation for twelve boarders.

Mr. Hooper—This is a different sort of licence to the one held by Bertelone, whose licence was held under different conditions.

Mr. Harding—But I think Bertelone did not keep boarders. This man takes boarders.

Mr. Hooper—You cannot say this was in succession to the old licence.

Mr. Harding—Not exactly. Bertelone did not take boarders. This man does. Here is the proposed menu. (Copy handed in.) The late manager of the Vienna Company will be associated with the business, joining it in March.

Mr. Shenton appeared to oppose the application. In the first instance he submitted that a restaurant licence would be sufficient to meet the requirements of the house, and pointed out that in granting a restaurant adjacent licence their Worship had power to impose conditions as to the manner in which the drinks should be served with meals. Under the old adjacent licence the intention and object of the Ordinance was evaded by simply placing sandwiches on the table, and he submitted that this application could be evaded in a similar manner. Meals in a restaurant were continuing during the whole course of the day, and therefore a sandwich served with a drink would be sufficiently within the licence whereas with restaurant adjacent licences the Justices were entitled to impose any conditions they liked as to when drinks were to be served. One of the points taken by Mr. Harding was that the house had already had a licence but that licence had been transferred to another part of the town. Since the date when that licence was granted two others had been granted: an adjacent licence for the Kator House and an adjacent licence for the Vienna Cafe.

Mr. Harding—I would like to say that at the time the adjacent licence was granted to Bertelone there was also in existence for Weissmann's.

Mr. Shenton said he was instructed by Mrs. Oliver that she was very instrumental in getting the opposing petition signed, so he thought they could take it that her support was not such as the applicant would desire. In respect of those particular premises, an application was made for an adjacent licence on the 23rd September last. That application was considered at the Magistrate's and refused. The next point he wished to raise was whether this licence was required in the neighbourhood. That was really the material and chief point for the Justices to consider. By granting this licence they were granting a monopoly, and that monopoly should be for the public benefit. The speaker enumerated the houses holding licences in Queen's Road, and asked if it seemed fair that the number of other restaurants in Queen's Road should not have these licences.

He also wished to remind their

Worships that Queen's Road Central was in a part of the town which was a keen business centre, and he submitted that it was not for the benefit of business that there should be all those drinking houses there. He asked the Justices to refuse the application.

Mr. Harding pointed out that there was a great distinction between this house and those enumerated by Mr. Shenton. Many of the latter were houses which sold only liquor. They did not pretend to sell food.

The Court was then cleared and the Justices considered the application in camera. On the Court being re-opened Mr. Kamill was informed that his application was refused.

The next application was from P. O. Ponster for a hotelkeeper's adjacent licence to sell by retail intoxicating liquors at the Peak Hotel.

Mr. H. J. Gedge, of Messrs. Johnston, Stokes & Master, appeared for the applicant. He stated that the character of the hotel was very well known. It was full of guests, consisting at the present moment of naval and military men, their wives and families.

The Chairman—Are there any special circumstances?

Mr. Gedge—No. I will just ask for the licence.

Mr. Craddock—What form of licence?

Mr. Gedge—An adjacent licence.

Mr. Hooper—There is a billiard room.

Mr. Gedge—Yes.

Mr. Hooper—What happens if there are guests not residents of the hotel? Cannot they have any drink?

The Chairman—No.

Mr. Hooper—Except at the expense of the host.

Mr. Gedge—Guests in the hotel can have drinks in the billiard room if they order and pay for them.

The Secretary pointed out that according to the Ordinance drinks could only be had in the dining room and in connection with regular meals.

Mr. Gedge stated that if a guest of the hotel was playing billiards with a stranger and the guest ordered whiskey and soda for both it was perfectly in order. It was the guest of the hotel who ordered drinks. As long as it was sold to the host it did not matter what he did with it.

Mr. Thomson—It is sold to persons resident in the hotel. They may have it in their bedrooms.

Mr. Gedge—Do you wish to see my client?

The Chairman—No.

The application was granted.

LOCAL SPORT.

SHIELD FOOTBALL.

NAVAL YARD V. "KING ALFRED."

This semi-final tie was played on the Club Ground yesterday afternoon in the presence of a fair number of spectators. The afternoon was by no means an ideal one for football, the rain having made the ground treacherously slippery, and before the game was long in progress the heavy ball troubled the players. The teams lined out as follows:

N.Y.—Ryal; J. C. Joughin and Harding; Anderson, Brown and Macey; Wilks and Watkins; Read; Sullivan and Dalziel.

K.A.—Tugwell; Haw and Carlyle; Richardson, Brown and McBean; Steele and Lee; Fleming; Gardiner and Hobbs.

The game opened briskly, both ends being visited in turn, but the respective defences were not to be caught napping and midfield play was the rule. The Yarders were first to adapt themselves to the vagaries of the slippery ball, and Tugwell was kept busy saving shots from Sullivan and Read. The Yarders soon had perseverance rewarded from a shot by Read hitting the bar and rebounding to Dalziel. The latter tasted Tugwell, but he was unable to clear from Sullivan who put the ball into the net. The placekick was not made good to the flagpost, and the Yarders took full advantage of their opportunities and were soon playing with their opponents' defence. A free kick for a foul throw against Macey was well placed by Carlyle, and Ryal was forced to save at the expense of a corner. The kick from corner was placed far into the field. Brown helped it on with a long kick, and Carlyle headed the ball further towards his own goal, as it might have been, and scored the leather and easily beat Tugwell for the second time. King Alfred were now completely demoralised, and the Yarders did as they liked with them, adding another goal from a penalty before the interval. Half-time scores were: Naval Yard, 3; King Alfred, 0.

The re-commencement again saw Yarders all over their opponents, and despite the sterling defensive tactics of Carlyle and Haw, Read added a fourth. King Alfred scored their only goal of the match, the result of a penalty for a foul against Harding, Fleming converting. Time was called with the scores—Naval Yard, 4; King Alfred, 1.

ARMY AND NAVY SHIELD.

To-day—King Alfred v. R.E.

Club Ground, 3 p.m.

Referee, Gunner Marsh.

TEAMS.

R.E.—Barber; Durrant and Morgan; Oddy; Barton and Jackson; Omond and Taylor; Brown; Blackwell and Le Gros.

King Alfred are expected to field the same team as represented them yesterday.

LORD C. BEREFOED'S DEMAND.

Lord Charles's Beresford, in a letter to Colonel Hickman, Unionist candidate for South Wiltshire, says:

In 1912, according to the First Lord of the Admiralty, Great Britain would have only 20 Dreadnoughts to Germany's 17. This small margin is no insurance at all, as it might happen that the whole of Germany's 17 ships were ready for immediate action, while five out of our 20 would be in Dockyard hands for repairs. Germany can build and turn out a destroyer in considerably under a year, whereas the British up to now have been taking nearly two years. Whoever party comes into power, we shall have to find out on whose shoulders the responsibility rests for endangering the empire. We shall not be able to make up the debt we owe to shipbuilding without the sanction of fifty millions sterling, which ought to be obtained by a loan, and the work should be commenced at once.

SHIPPING NOTES.

It is reported that the N. Y. K. steamers *Biojun Maru*, *Kagoshima Maru*, *Fuefuki Maru* and *Higo Maru* have been sold to Mr. J. Harada, of Osaka.

The British-India steamer *Lodiana*, which is considerably overdue on the voyage between Mauritius and Ceylon and has not been sighted by the *Yola* sent out to search for her, formerly kept up a regular service between Singapore and Indian ports. She was built at Dumbarton in 1884.

The S.S. *Hanyang*, one of the China Navigation Company's fleet, while bound from Japan to Hongkong with coal, struck a rock in Hainan Bay, near Haiphong, on Friday, and had to be beached. So far as is known she is not seriously damaged. A steamer carrying salvage gear was dispatched on Sunday to her assistance. The *Hanyang* is commanded by Capt. Trowbridge.

Mr. D. W. Craddock, General Traffic Agent of the C. P. R., writes:—We have just been advised by Yokohama Agency that they are in receipt of a wireless message from the R.M.S. *Empress of Japan* to the effect that the Commander hopes to reach Yokohama at 6 a.m. on Thursday next, the 24th instant. This message was despatched at 8 p.m. on Sunday, the 20th instant, at which time the vessel was 1,100 miles distant from Japan. The *Empress of Japan* left Vancouver on the morning of the 10th instant.

The Ship Subsidy Bill now before the United States Congress is likely to pass into law during the present Session. Section 4 of the Bill doubles the present tonnage tax on foreign vessels, the owners of which will thus contribute to the bounty about to be given to United States vessels. The increased tax, a correspondent of the *Times* points out, will mean a payment of about \$2600 per annum on a steamer of about 5,000 tons net register.

A contemporary points out that there are something like 75 cargo companies, trading out of Great Britain, owning 538 steamers, that is, large companies, and they represent a capital of \$9,517,000. Without going into more figures than is necessary, it may be said that these 538 steamers made a total profit on their voyages of \$247,997, out of which they would have to pay £176,955 for interest on loans, etc., besides expenses for management, offices, etc., and that what dividends have been paid have been taken out of the capital, or past earnings as in the four preceding years. No less than 44 of these companies have been unable to pay their shareholders anything for last year, and 46 of them have put nothing aside for depreciation. The dividend averages 1.39. This must mean a reduction in capital if things don't improve.

Out of 22 liner companies the average dividend paid last year only amounted to 1 per cent, and it is worth while looking at them to see who pays—

African Steamship Co.	5	5
Anchor Line (India)	3	10
Australasian United	7	7
Booth S. S. Co.	3	3
British India Co.	6	44
China Mutual S. S. Co.	5	32
Celanese	5	5
Canard Steamship Co.	5	5
Ellerman Lines	4	25
Harland Line	5	5
Indo-China S. N. Co.	5	5
Leyland & Co.	5	5
National Steamship Co.	5	5
New Zealand S. S. Co.	5	5
Oceanic S. N. Co.	10	5
Orient S. N. Co.	5	5
P. & O. S. N. Co.	4	9
Royal Mail S. P. Co.	5	30
Swire Line	5	5
Shaw Savill Co.	5	5
Union Castle Line	4	92

There are 845 vessels of £43,306,771 value in the above companies with a gross tonnage of 3,885,415 and the dividend works out at 4.10 per cent.

With the next visit of the Great Northern liner *Manacota* to the East a direct service will begin between Manila and the United States. The new 1910 schedule by which the *Manacota* will leave Seattle on March 2nd and will eliminate Chinese ports on the return trip. The vessel will make Yokohama, Kobe, Nagasaki and thence to Manila. Then to Hongkong, where she will remain nine days, giving passengers the opportunity of visiting Canton, Macao and other places of interest in China. She will then return to Manila for cargo and passengers for the States, arriving on the 5th of May and departing on the 7th, going to Nagasaki, Inland Sea, Kobe, Yokohama and then directly to Seattle, arriving June 3, thus giving the Philippines a direct mail service to the United States.

Several P. & O. commanders received the new Decoration of the Royal Naval Reserve in the last Honours List. We notice in the list of Commanders of the Order the names of Capt. C. W. Bennett, Capt. C. C. Talbot, Capt. J. W. Andrews, Capt. H. W. Kenrick, Capt. Owen Jones, Capt. G. H. C. Weston, Capt. G. W. Cookman, Capt. W. G. Gregor—all in the P. & O. service. Among the Lieutenants of the Order we notice the names of Messrs. A. O. Cooper and G. E. Bridge, of the C. P. R. Service.

The Osaka Asahi reports that the Nippon Yusen Kaisha is making arrangements to transfer the *Shinano-maru*, 6,388 tons, from the Seattle to the Formosa service. The N.Y.K. has two 6,000-ton steamers on the service already, and the addition of the *Shinano-maru* is said to be an evidence of determination to fight the competition of the Osaka Shosen Kaisha to the bitter end. The latter company is placing the *Kagato-maru*, 6,000 tons, chartered from the Navy Department, on the service.

COMPANY MEETING.

HONGKONG AND WHAMPOA DOCK COMPANY.

The half-yearly meeting of shareholders in the above company was held yesterday at the offices, Connaught Road, Hon. Mr. W. J. Gresson presided, and there were also present: Sir Paul Chater, Messrs. H. P. White, J. W. Bando, D. W. Craddock, E. G. Barrett, H. A. Siebs, F. Lieb (directors); R. M. Dyer (chief manager); W. Jolly (secretary); Ho Fook, Lo Cheung Shie, Chau Siu Ki, P. Stoppa, W. H. Wickham, J. W. C. Bonnar, K. Sayce, F. B. Marshall, G. H. Medhurst, H. Humphreys, H. Percy Smith, A. H. Ough, P. H. Rolfe, S. Michael, and Hedley White.

The Secretary having read the notice convening the meeting.

The Chairman said:—Gentlemen,—The Report and Accounts owing to the China New Year holidays have not been in your hands for many days, but with your approval I propose to take them as read. It is a matter of great regret to your Directors that the earnings for the period covered by the accounts show such a big result and that there has been such a serious falling off in our gross receipts. You are all aware of the keen competition we have now to face, not only from our local competitors, but also from all docks both North and South, and in addition I think it must be admitted that shipowners, owing to the depression in the shipping trade, have reduced the expenditure on overhauls and upkeep to the lowest figure compatible with efficient and economical running. As compared with the six months ending 31st December, 1908, the tonnage of vessels docked shows a decrease of 181,120 tons. Our turn-over for the same period is in round figures some \$756,470 less. Our establishments and machinery have been kept in thorough repair, expenditure on other upkeep being paid for out of revenue. Additions to plant, while not very expensive, will tend to economy in the future. Dealing with the Balance Sheet, you will notice that Directors and Auditors' fees have been debited to the accounts before you. I refer to this, as previously it has been customary for these items to be paid for in the following six months. There are two items on the Asset side which call for special reference. Value of material on work in progress, say, \$13,000, as against \$131,000 last year, and value of material on hand reduced from \$1,299,000 to \$914,500. Since we last met this question of the value of stock has received the most careful consideration of your Directors, and it has been deemed expedient to write \$170,000 off the book value. The correctness of the reduced figures you will observe are certified to by your Chief Manager. All articles on the stock lists have been valued at a price at which they should be saleable or useable, and it is hoped that the money locked up under this heading may be gradually and permanently reduced. The total expenditure on Reorganisation is \$47,257.74. This money I trust the future will demonstrate has been well spent; we have already had practical evidence of its advisability, for although our staff has been much reduced our efficiency has not been impaired, and we are ready at short notice to undertake work at the Docks showing a monthly saving in wages alone of \$7,000, and to the reorganisation under Hongkong Office expenses I will refer when dealing with revenue account, to which I will now pass on. In interest and other charges there is little or no difference. Office expenses have been reduced from \$30,500 to \$19,900. On the other side of the account you will regret to notice the very large decrease in Net Earnings, which have fallen from \$378,000 to \$63,000. The removal of Head Office to Kowloon Docks has proved a success. The Chief Manager and Secretary have their headquarters on that side, and either the one or the other being in constant attendance, enables firm control being kept over all expenditure. Concerning the future, it will reassure you to know that we are again working at a profit, and as the shipping trade improves there are indications that the long looked for revival of business is at hand, which must react in shipping, and we are happily in a position to take full advantage of all work that may come our way. In this connection I may mention that work on the No. 1 Dock Extension is now making satisfactory progress, and when completed that dock will be able to accommodate the largest steamers visiting this port. In order to extend our field of operations your Directors have decided to undertake the construction and manufacture of all classes of engineering work, structural bridge-work, railway rolling stock, &c. &c. Gentlemen, I have endeavored to make the position clear to you, but if any shareholder desires further information about the Report and Accounts I shall be pleased to afford it.

Mr. Humphreys:—Mr. Chairman,—I should like to refer to one or two items in the accounts. The report reached me only two days ago, and I have not had time to look through it as I should like. The first thing to which I would like to refer is the item "directors' fees." I notice that in 1887-88 the directors' fees were \$3,500 for the half-year, and from 1889 to 1901 they were \$4,500 half-yearly. In the two following years they were reduced to \$4,000, the following year again to \$3,500 and up again in 1895 to \$4,000, down in February, 1906, to \$3,500, up in August of the same year to \$7,000, and continuing at that figure for the next four and a half years. In 1909 they were \$3,000, in February, 1901, \$9,000, and in August of the same year \$10,000. That seems to have been the high-water mark in directors' fees. During that period the company, with one or two slight setbacks, prospered and continued to prosper, and the shareholders welcomed the

increased fees to directors and gave them ungrudgingly. Last year the directors took half the fees to which they were entitled, \$5,000, and I think the shareholders were very grateful to them for that concession. As this year is very much worse than even last year, I look forward to seeing a similar concession on this occasion. I know the directors are entitled under the Articles to \$10,000, but it seems rather an anomaly that we should be paying the directors \$10,000 now, that we are making no dividends and even incurring losses, and that when we were making handsome profits, we were paying only from \$3,500 to \$4,500 for the half-year. I do not wish to make any point of it, but merely leave it to the directors. It would be almost out of place perhaps to refer to whether the directors used as much tact and foresight as was possible eight or nine years ago, when our troubles commenced. It may be, or it may not be, that if they had, the Admiralty dock and Butterfield's opposition might have been staved off then. It is no use crying over spilt milk. The thing's done, and nearly all the directors who are on the board now were not directors then. It only remains for me to personally assure the directors of my hearty support in their fight against the opposition. I do not think we have got anything to be afraid of. We have capital about a quarter of the size of theirs, our debt though largely increased of late years, is still very much smaller than theirs, and we can do our work as well and as quickly, and do more of it because we have more docks, and I for one am not afraid. As I say, I am prepared to give the directors my loyal support in every way. There is one other point to which I would like to refer, and that is the large sum written off for depreciation of stock, \$170,000. I am not quite clear whether that is written off as depreciation or because the stock was previously over-valued. Of course we hope our new manager is quite correct in his figures. At the same time we know that now brooms like to sweep clean and leave nothing behind in the corners if possible, and leave no dead horse to wobble off, and if possible to have a little on the credit side to start with. That is the experience I have had with new managers of my own. If this allowance is too large and puts the stocks to-day below their real value, I consider that an error of policy, because I like to see stocks rather over than below their cost value, inasmuch as when making estimates or in selling you are liable to look at book prices and not actual cost, and in that way you may be losing money, whereas if stocks are slightly over their real value there is not the least fear of loss on that score. I should like the Chairman to assure me that the stocks were not over-valued previously.

The Chairman:—Mr. Humphreys, with regard to the directors' fees, that matter received the very careful attention of directors at meetings before they decided to issue the balance sheet and report, and it was thought, considering the amount of extra time—extra meetings connected with re-organisation and other work done—and recognising with yourself that the company is not in a very serious pecuniary position, that we were more than usually entitled to our fees. We have had great deal more work during the six months than probably any directors of this company have had to undertake. As to how the fees go up I cannot remember that straight off without reference, but I think I am correct in stating that the increased fees from \$3,500 to the higher figure referred to were approved of in general meeting. Referring to the stock, the amount which has been written off as depreciation is in fact depreciation. A great many articles have been in stock for a number of years, and many of them are practically unusable. Some have gone out of fashion, others have depreciated, so that ships' captains and others coming along will not take them. They want something more modern and up to date. As to the writing of it down, I do not agree with you, as I think it strengthens the position of the company. We now have these things, and it is our intention to realise on them. Having them written down, we could melt them and use them again in the foundry. I hope you will consider my answers satisfactory.

There being no other questions, the Chairman moved the adoption of the report.

Mr. F. B. Marshall:—Mr. Chairman,—In rising to second the report, I feel safe in saying I am voicing the feeling of all shareholders in regretting the poor results of the past year, but think the difficulties our Directors have had to contend with are fully appreciated, and, sir, from the lucid and able speech we have just heard from you, there should be no reason to be despondent. The future looks hopeful, and I trust the improvement in trade that appears to be evident will mean a large increase of profitable work to the Dock. The management is to be congratulated on the economies you refer to in the saving in wages and office expenses, and more so as you assure us the efficiency of the staff had not been impaired thereby. With these few remarks, sir, I have pleasure in seconding the report, and feel confident that when we next meet you will be able to dismiss the meeting with those words that are so familiar and acceptable to us as shareholders of the company, "but which you have to withhold to-day." (Applause.)

The motion was agreed to.

The appointment of Mr. Lieb to the directorate was confirmed, on the motion of Mr. Bonnar, seconded by Mr. Ho Fook.

Mr. Wickham proposed the re-election of the retiring directors—Sir Paul Chater and Mr. H. P. White.

Captain Rolfe seconded, and the motion was carried.

On the motion of Mr. Humphreys, seconded by Mr. Chau Siu Ki, Messrs. H. Percy Smith and A. E. Lowe were re-appointed auditors.

The Chairman:—That is all the business, gentlemen. Thank you for your attendance.

SUPREME COURT.

Monday, 21st February.

IN CRIMINAL JURISDICTION.

BEFORE HIS HONOUR MR. W. REES DAVIES K.C. (ACTING CHIEF JUSTICE).

ALLEGED ARMED ROBBERY.

Three Chinese named U. Yau, Fan Shun and Tin Tin were indicted on charges of armed robbery and receiving. Prisoners pleaded not guilty, and the following jury was empanelled:—Messrs. E. O. Murphy (foreman), W. Davison, H. Wasserfall, T. Arnott, A. V. Monk, J. M. Alves and J. Mitchell. Messrs. O. Wagner and T. Meek failed to answer to their names.

Later they were summoned before the Court, and his Lordship, addressing Mr. Wagner, said:—I am informed by an officer of the Court that you were unwell?—Yes.

His Lordship:—It is always necessary in a case of this kind to send a medical certificate to that effect. If gentlemen don't attend, it places hardship upon others. I understand you were really unwell?

Mr. Wagner:—Yes.

His Lordship:—In future I should be glad if you would send a certificate to that effect. You may go.

Addressing Mr. Meek, his Lordship said, you did not answer to your name this morning.

Mr. Meek:—It quite escaped my memory.

His Lordship:—Things like that ought not to escape your memory. It is a duty all jury-men owe to attend the summons of the Court.

Mr. Meek:—I am quite well-aware of that.

His Lordship:—Never let it occur again. You may go.

The Attorney-General:—I think these two men ought to be put on the panel next month.

The Hon. Mr. F. A. Hazlehead, Attorney-General, instructed by Mr. H. L. Donnan, jr., from the office of the Crown Solicitor, prosecuted, and prisoners were undefended.

The Attorney-General informed the Court and jury that the prisoners were charged with armed robbery at Tahauna, near Saikung, in the new Territory. The robbery was committed on January 10th at 7 a.m., and evidence would be called to prove that there were six robbers armed with knives and revolvers. They stole a quantity of jewellery, \$63 in money and a quantity of clothing. One of the witnesses identified the first prisoner, who was not arrested until five days after the robbery, and when arrested he was found to be in possession of a pawn ticket for certain of the stolen clothing. The evidence against the second and third prisoners was much stronger.

At one a.m. on January 11th these two men were seen by two Indian constables some five hours after the robbery, on the road from Saikung. They were arrested by the police after a struggle and the second was found to be in possession of a revolver. Each carried a bundle which was found to contain part of the stolen property.

After evidence had been heard, the prisoners pleaded to make further statements.

The first informed his Lordship that men might be killed, and things might be similar to one another, but if a robbery was committed evidence must be tendered, and the stolen property must be obtained.

The second prisoner asked his Lordship to cause the robber to be arrested. He did not commit the robbery.

The third prisoner asked his Lordship to make further inquiry. Nothing was found on his person, as everybody knew.

The jury found the first and second prisoners guilty of armed robbery, and the third prisoner guilty of receiving by a majority of six to one.

His Lordship, in passing sentence, stated that the offence of armed robbery was extremely rare in the Colony at present, and it was his duty to do all in his power to put it down. He hoped the sentence he was about to inflict would make the first and second prisoners endeavour when their long term of imprisonment was over, to live decent lives again; the more so as they would experience some of the corporal punishment which men of their class were so fond of inflicting on other people. Both were sentenced to imprisonment with hard labour for five years, and to receive 20 strokes of the birch. The third prisoner was sentenced to three years' imprisonment with hard labour.

ALLEGED UTTERING OF FORGED ORDERS.

F. J. Rodrigues was indicted on charges of uttering forged orders for the delivery of goods. Prisoner pleaded not guilty, and the same jury was empanelled as at the previous case.

The Attorney-General stated that the defendant was charged with obtaining certain goods from Weisman & Co. and Watkins & Co. on forged orders. The defendant admitted having received the goods on these orders, but said he got the orders from a man named Thomson, who told him that he had authority to sign the name of Mrs. Melissa Thomson would be called as a witness, and would deny this. In cases of forgery it was necessary to prove intent to defraud, and it was for the jury to say whether they considered the prisoner had that intent.

The jury, after hearing the evidence, brought in a verdict of not guilty by five to two, and the prisoner was discharged.

IN SUMMARY JURISDICTION.

BEFORE HIS HONOUR MR. H. H. J. GOMPERTZ (PUNING JUDGE).

ALLEGED WRONGFUL SEIZURE OF A JUNK.

Action was brought by Wong I against the Mitsui Bussan Kaisha to recover \$1,000 for damages alleged to have been caused to the plaintiff by the seizure and detention by the defendants or their agents of a lighter laden with forty tons of coal. Plaintiff valued \$118.30 to bring the claim within summary jurisdiction.

Mr. Eldon Potter, instructed by Mr. J. H. Gardiner, appeared for the plaintiff, while the defendants were represented by Mr. Davidson (of Messrs. Hastings & Hastings).

The statement of claim showed that plaintiff traded as the On Fat firm, and the defendants or their agents seized or caused to be seized the plaintiff's junk containing forty tons of coal.

This was denied in the statement of defence, and the defendants further denied that the coal was the property of the plaintiff. If, which was not admitted, the coal was seized by the servants or agents of the defendants, it was not authorised by them. They denied that plaintiff was deprived of the possession of the coal and junk, and stated that they were seized by the police in connection with a charge of felony against one, Kwok Tai. Defendants stated that the coal was their property.

Mr. Potter, in opening, informed the Court that on or about August 3rd plaintiff had arranged to buy forty tons of coal from the Yuen Cheung firm, and the coal was put on a lighter at Wanchai, which was then taken to its usual berth at Yauwatt. On the following day, on account of the stormy weather which prevailed, plaintiff decided to unload part of the coal into the Hoi Ping godown. The junk was taken there, and when it ran alongside the wharf they had to wait some time for coals. While they were waiting most of the crew went ashore, and a few hours later two Japanese and a policeman boarded the junk, and the man who was left in charge was arrested. He was taken to the police station, and later Sergeant Davies came on the scene and the junk was attached to the launch of the Japanese and towed across the harbour to the police quarters. The man who was arrested was charged with larceny of the coal, and when his master heard of it he took the debt note for the delivery of the coal to the Magistrate, and did everything in his power to convince the police that the coal was his. The police and others inspected the books of the firm where the coal was purchased, but the prosecution was proceeded with and continued for six weeks, when the case was withdrawn. Counsel understood that the police took no active part in the prosecution, which was private. During the six weeks of the prosecution the junk remained at the police quarters, and when plaintiff examined it he found that it had sunk. Practically the whole of the bottom of the junk had to be replaced on account of the destruction wrought by worms.

After hearing the evidence his Lordship reserved his decision.

THE PHILIPPINE CARNIVAL OF 1910.

The Manila *Cablenews* says:—The Philippine Carnival for 1910 is an event of the past, and the fact suggests several reflections. The big festival was a financial success. It is not yet known just how much money was made, but it is certain that the deficit inherited from 1909 has been wiped out and a neat balance put in the treasury.

The Carnival was a social success. The entertainment furnished by it was participated in and enjoyed by a larger proportion of the people of the country than have taken an interest in any other one event since American occupation of the islands unless one accepts the first or second Carnival.

It was an advertising success. The circulation of Carnival literature, the preparation of Carnival exhibits and the coming of visitors to Manila to attend the festival have awakened interest in this country in more places than have been reached by any other one form of promotion, we believe. As we have remarked before, the industrial exhibits brought together at the Carnival gave the visitors from abroad a good idea of the resources of the country and created impressions that are sure to result in more commercial activity in the islands.

For the success of the Carnival the men who have had it in charge—Director-General John Mohan and his able corps of assistants—deserve great credit. They have worked hard, every man of them, and have managed with discretion. The more substantial support given—the enterprise by Governor General Forbes and the Government contributed largely toward the fortunate outcome of the venture. Major General Duval and the officers and men of his command also came in for a large share of the gratitude of the community for the successful Carnival just closed.

After all, we are not so sure but that the very best feature of the whole show was found in the fact that the people of the community were able to make it a success. When one takes into account the discouraging circumstances that confronted the Carnival Association when the work of preparing for the festival of 1910 was begun, the successful issue of the undertaking is little less than wonderful. It is the notion of the writer that better than the financial success, better than the social success and better than the advertising success of the Carnival is the fact that the people have been able to join hands and pull so much success out of apparent failure. We do not remember to have seen so much unanimity of spirit, so much co-operation, so little knocking manifested in the forwarding of any enterprise in Manila.

So we say the success of the Carnival is a foretaste of what this community may accomplish in the future; it is a promise of achievement in the campaign of promotion that is being begun. The *Cablenews-American* congratulates the Carnival management and those who co-operated with them on the Carnival of 1910.

LIFELONG ECZEMA CURED AT LAST

Great Eruptions Broke Out When but a Baby and Lasted 19 Years—Pronounced Incurable at Hospitals—Pain and Disfigurement Terrible.

CUTICURA'S SUCCESS QUICK AND PERFECT

"Cuticura has completely cured me of watery eczema after nineteen years of suffering and fruitless remedies. I am now twenty-one years of age and the eczema began when I was about four months old. It started on my face with a blister, which would fill with watery matter and then burst. My parents tried everything they could think of but the disease spread until my face, arms and hands were completely covered. The irritation and pain were so great that they had to tie my hands up in wadding to prevent me from scratching the sores. My parents placed me in a private hospital. When they decided to take me away my eczema was not only worse but my health very much lowered."

"After this, three public hospitals were given a fair trial with my case and at every one I was pronounced incurable. The doctors said that I should have these eruptions every spring and autumn. The blisters were a fearful nuisance and got worse as I grew older. The pain of these sores was really terrible and the effect on my health was very bad. Apart from this I experienced great distress from being disfigured, both in private life and in business, for no one liked to come too near me."

"At the earnest recommendation of a friend, I decided to give Cuticura a trial two years ago. Almost immediately I lost the pain and irritation and the spots rapidly disappeared. I received a box of Cuticura Soap and Cuticura Ointment and the result has been to rid my system completely of the disease. Mrs. Desmond Jennings, 15, Nevill Road, Stoke Newington, London, N. Eng., Dec. 19, '08."

Cuticura Remedies are sold wherever the British Empire is represented. Sole Importers for the Straits Settlements, Singapore, and F.M.S. are Messrs. J. B. & Co., 11, Cross Street, Singapore. Sole Importers for the Malay Peninsula are Messrs. J. B. & Co., 11, Cross Street, Singapore.

THE NAVY'S BEST SHOT.

CHINA FLEET LEADS.

The Admiralty, which issued a Blue-book last month on the result of the test of gunlayers with heavy guns in the Fleet in 1909, notes with satisfaction that the standard of shooting which was attained by 1908, and which was in advance of that of previous years, has been maintained.

There is a slight improvement in the hits per gun per minute in the case of the big 12in. weapons, but a small falling off since last year in the hits per minute with the 9.2in. and 7.5in. guns.

The first four fleets in order of merit are the China; Home Fleet, 3rd Division; Home Fleet, 2nd Division; and Atlantic. The Home Fleet, 1st Division, which contains all the Dreadnaughts, comes only fifth.

The best ship in the whole Fleet is the armoured cruiser *Natal*, of the Home Fleet, 2nd Division. She did superb shooting, making an average of 3.6 hits per minute with each of her 9.2in. guns and 5.4 hits with each of her four 7.5in. guns.

The following were the best shots with the various calibres of guns in the whole Fleet:

Ship	Gun	in 1 min.	Material fired
W. Higman, P.O.	Temeraire	12in.	1,858lb.
H. Fincham, P.O.	Natal	9.2in.	1,858lb.
G. Heston, P.O.	Natal	7.5in.	1,228lb.

Gunner, R.M.A. K. Alfred 6in. 1,228lb. By every test Petty Officer H. Fincham, of the *Natal*, is the best shot in the Fleet, as he accomplished the extraordinary feat of making five hits per minute for ten minutes with the big 9.2in. gun, which fires a 380lb. shell, and weighs twenty-eight tons, thus pumping metal at the rate of nearly a ton a minute into a diminutive target.

Exploration of Mongolia.

BRITISH EXPEDITION.

Renter's Agency is informed that preparations are in progress for the despatch of an important British expedition, which is being organised privately, to Western and North Western Mongolia, a region concerning which practically nothing has been written in the English language. Russian explorers alone have done any extensive work in the country. A great point of interest is the fact that the region is the cradle of the ancient Turkish race. The objects in view are thoroughly to explore the country from the botanical, zoological, and geographical standpoints. The scene of exploration presents various aspects, the Gobi desert being bordered on the north by high mountain ranges.

The goal of the expedition is the upper course of the Yenisei, a large shut-in basin, very little known. This is surrounded by high mountains, and is covered by dense forests and bogs. The expedition will consist of Mr. M. P. Price, who goes especially to study the forestry and botany of the country, Mr. J. H. Miller, and Mr. D. Caruthers, who will divide the work of natural history and the management of the expedition. Both the last-named have had considerable experience in Central Asia. The expedition will leave England at the end of March, travelling by St. Petersburg to Krasnoyarsk, the nearest point of the Siberian Railway to the field of exploration. Thence they will go by steamer up the Yenisei River to Minusinsk. Thence the caravan will be organised, and the travellers will proceed into Chinese territory. The country to be traversed lies between Lake Balkal and Chinese Turkestan. The expedition will probably be absent a year, and the route of the return will depend on circumstances. The Chinese Government has given the necessary permission to travel in the country, and is lending all assistance.

It is hoped that some archaeological discoveries will result. Although the country is too far north of Chinese Turkestan to yield discoveries similar to those made by Dr. Stein, it may yield some traces of the existence of the original Turkish people, regarding whom no real investigation has been made. Possibly the chief interest of the undertaking centres in these investigations, which will now be conducted by Englishmen for the first time.

LATEST STEAMER MOVEMENTS.

The L.G.M. str. *Yorck* left Shanghai on the 19th inst. at 6 p.m., and may be expected here to-day at 6 a.m.

The N.Y.K. str. *Hakata Maru* (European Line) left Singapore on the 18th inst., and is expected here on the 24th inst.

TO CONQUER MALARIA.

WORDS OF WISDOM FROM A PHYSICIAN'S PEN.

"Those who conquer Malaria conquer the tropics," is a proverb with which every resident in the tropics is familiar. While in consequence of the onward march of scientific achievement, this disease, so depressing in its onset, so devastating in its effect, and so disorganizing in its result to the whole system is better understood than it used to be, it is still, unhappily, exceedingly prevalent, and is likely to continue until the conditions which produce it have been banished.

Most people know that while Malaria may take various forms it is due to a special germ or microbe, which destroys the red corpuscles by which the oxygen of the air is carried by the blood to every part of the body to burn up its impurities. The destruction of these corpuscles produces the marked symptoms so characteristic of the disease—the pale, sallow, earthy complexion, the morbid thoughts and feelings, the aching muscles and the tender joints.

Bad as is all this, the result of Anemia or poverty of the blood, as it is commonly called, which makes life a burden to the sufferer, it may go considerably farther until it produces that wasted and dangerous condition of the system doctors call "Chelazia."

For long Quinine has been the shoot anchor of the physician, and in the acute stages it generally answers admirably, but in the later stages something else must be employed to destroy the effects wrought by the microbes.

Happily, in this conquest of the hosts of the disease germs which invade the body under the banner of Malaria, the physician has been presented with a weapon as potent over them as the modern machine gun is potent against the old flint lock gun. This weapon is Sanatogen, one of the most powerful restoratives and vitalising agents ever given to the world. Its remarkable properties are due to its two constituents Casein, the solid portion of pure, new milk, and Glycophosphate of Soda, a preparation containing phosphorus in the precise form in which it exists in the body. Phosphorus, as everyone knows, is not only as a physician has written "indispensable to the nervous system," but is also "absolutely essential for the growth of what physiologists term the cells of the body, the microscopic bricks of which the human edifice is constructed." This cell growth is greatly interfered with in Malaria, and a supply of phosphorus which is easily absorbed by the depleted system is urgently necessary to restore it to its standard activity. Nothing does this so well as Sanatogen, as nothing so rapidly restores the vitality of the blood as this preparation, physicians in the world because no secret has been made of its constituents and they realise its overwhelming value in restoring the functions of the body to do their duty.

How rapidly Sanatogen restores the blood after Anemia may be judged from the fact that one eminent physician records that the red blood corpuscles in a patient increased eighty thousand per cubic millimetre in a week, and the percentage of red colouring matter in them advanced from 61 per cent. to 65 per cent., while another patient who was unable to take any solid food and was losing weight rapidly improved in a fortnight that the red corpuscles increased two hundred thousand per cubic millimetre, their red colouring matter from 48 per cent. to 52 per cent., and she was able to resume her household duties, completely cured of the terrible melancholia from which she was suffering.

Children are especially liable to Malaria, and its pernicious effects which may delay their development and stunt their growth. When given Sanatogen they rapidly improve. One child who at three years old of consequence of Malaria, weighed only half a pound more than it did when it was a year and a half, was given a small quantity of Sanatogen daily, and its weight at once began to go up half a pound a week.

Just as Malaria causes wasting in children, it makes adults prematurely old, in consequence of the depression of the vitality of the system. This condition is rapidly cured by Sanatogen, which restores the prematurely old look and soon substitutes for the feeble and listless spirit a healthy interest in normal pursuits.

An exceedingly interesting pamphlet on the subject of Malaria has been written by a physician who had a wide experience of it in the tropics. In order to give this momentous publication, "Malaria, its Causes and Effects," the widest publicity, the proprietors of the copyright have instructed Messrs. A. S. Watson & Co., Hongkong, to distribute a limited number of copies free of charge, to anyone who may feel interested in it, and will send a post card mentioning the HONGKONG DAILY PRESS, and direct from Messrs. A. S. Watson & Co., Hongkong, and at all chemists.

TIN-PRODUCTION IN YUNNAN PROVINCE.

(By W. F. COLLINS.)

Mr. W. F. Collins, a mining engineer who has spent a good deal of time in Yunnan during the last year or two, recently in London read before a meeting of the Institution of Mining and Metallurgy the following very interesting paper on the above subject:—

Practically all the tin produced in China is derived from the Kottien Nines, situated 30 miles west of the inland Treaty Port of Mong-tse (pronounced "Mung-zar"), in Yunnan. During the last 17 years their recorded output has shown an average steady increase. Its percentage of the world's production has risen from 2.7 in 1891 to 4.2 in 1908. The whole industry is in the hands of the Chinese, and any interference by Europeans is strongly resented. Methods are primitive in the extreme. Smelting is carried out in furnaces which have probably been evolved on the spot, and are different from any others used for smelting tin. The chief difficulties met with are an absence of fuel for concentrating the ore, and the high price of charcoal for smelting. The completion of the Haiphong-Yunnan Railway line, which passes near Mong-tse, connecting the district with the Gulf of Tongking in the China Sea, may have a far-reaching effect on the development of the industry.

Historical.—It appears that galena lodes, worked for silver, and discovered in the 16th century, were the first deposits opened up in the district.

In 1872 the mines were visited by M. Emilio Reicher and described shortly in "Le Province Chinoise du Yunnan." This was at the end of the thirty years' Musulman rebellion, which cut off half the population of the province and ruined mining, its most important industry.

Mines of tin, silver, copper, zinc and iron were then being worked near Kottien. All these metals, except tin, have long since ceased to be produced, probably owing to the increased cost of fuel. The tin output is said to have reached close upon 6,000 tons yearly at one time. Taking into account the steadily decreasing consumption of tin in China and the ravages which have been caused by civil war, plague and famine in the province, this statement may be correct. Even the recent history of the mines is marked by a series of outbreaks of lawlessness, due to the weak hold of the Government upon the mining population.

There are now about 30,000 men engaged in the mining, the concentration and smelting of the ore. The metal which is all reduced locally, is exported to Hongkong, and then, after refining, the greater part passes to Europe.

Occurrences and Nature of the Mines and Ore.—The deposits now worked are all of alluvial origin. They are found on the surface or in hollows in the limestone, probably of Middle or Lower Tertiary age. The mines are scattered over an area about 25 miles long by 20 miles broad. The deeper deposits are much the richer, and in this case the open-cast method of mining, which is usual, has been abandoned for true underground mining, or rather tunnelling, for European methods have not been adopted.

The tinstone, which is usually of sand-grain size, occurs in highly ferruginous bedded deposits. The underground ore usually contains a little magnetite and as much as 55 per cent. of hematite. There is always a small percentage of lead in the ore. Seeing that the slags from the district usually contain about 1 per cent. of tin, it is possible that the tin may be derived from lodes in the vicinity, in which granite outcrops also exist.

Mining and Concentration.—There is a complete absence of elaborate mining-plants underground or at the surface. The tunnels vary in sections from 5 ft. by 3 ft. to mere burrows, through which the under-sized miners can only just crawl, and extend in some cases, for nearly 1,000 yards from the surface. They are usually cut at an angle of about 45 degrees so that ladders are seldom necessary.

For lighting, cup-shaped iron oil-lamps are carried. They hang from a 2-ft. iron skewer, which the miner passes between his turban and the side of his head. At a certain distance from the entrances of the mines, the atmosphere is so foul that the lamps will not burn, so the digging of the ore, the placing of it in sacks, the carrying of it to the surface by the miners have to be performed in the dark. Wind-bells are used in some mines to aid ventilation, but as there is no regular circulation of air, the atmosphere at the mouth of even the best ventilated underground workings is indescribably foul.

The absence of water in the workings no doubt accounts partly for the fact that there are so few of these various accidents, sometimes involving the frequent hammer or entirely stop the working of Chinese mines.

Many of the miners are mere boys. Their pay is good, but the hard life, including every form of vice and entire absence of comfort and sanitation, kills the average miner before he is 35 years old. The advantage of small size in the narrow workings, and the influence of the foul underground atmosphere, have caused the survival of a fair proportion of dwarfs among the mining population, though this influence is modified by the fact that many of the men are engaged in farming in the dry season of the year.

The amount of ore mined in any year is chiefly dependent upon the rainfall and the amount of capital available. The capital of almost all the ventures being small, working expenses have to be paid directly by the output. The output can only be sold as concentrates, so that little mine usually lasts until the fall of the heavy rains, usually lasting from May to September. Mud-lined railways are built to drain the water, which would otherwise quickly lose itself through the sieve-like surface of the limestone.

When a certain amount of concentrates has been produced, the miner usually has to pledge it against credit to a merchant, who supplies him with rice, clothing, etc., for his families. The merchant is not infrequently engaged in the smelting business at Kottien. He thus insures a steady supply of concentrates for his furnace, while at the same time making a usurer's profit from the imppecunious miner.

Proprietorship, Mining Regulations, and Custom.—The mines were, until recent years, subject to a code of Provincial mining regulations. According to these, the underlying mineral belonged to the surface proprietor. Kottien practice does not render it necessary to have any permission from the authorities before opening a mine. The provincial regulations have now been abolished in favour of the temporary regulations of the Imperial Government. The mineral now belongs in theory to the Government, and neither prospecting nor mining may be carried out without permission, obtained through the local authorities, from Peking.

In the absence of a special concession from the central government, this system enables the authorities, when they have sufficient control, effectively to bar any enterprise which has not gained their goodwill. At Kottien, however,

the Government control is very weak above ground, and completely wanting underground. The miners are exceedingly jealous of their privileges, and in cases of murder, etc., in the mines, the offender may, or may not, be handed over to the authorities, who are never allowed to interfere. This work is carried on, in practice, under a committee of mine proprietors. Litigations are referred from appealing to the local officials by the knowledge that right often goes to the heavier and more skilful bidder.

Prospecting by means of bore-holes is unknown in the district. The would-be miner rents a likely piece of land from the proprietors (usually a family or clan), and sinks a pit. If he is successful in finding mineral, he continues to pit in the deposit; and, as long as he continues to work, and pays the rent fixed, he cannot be ejected by the surface proprietor. If the deposit looks well, he will usually be asked by friends for permission to start offshoots from his main working. These usually agree to pay him about 3 per cent. of their receipts for ore. They in turn may allow branch workings to be made, receiving about 6 per cent. of the sales, and so on. The deposit thus becomes honey-combed with an infinite number of small branch workings. These occasionally run into one another, and given good ore and equal forces of miners, there are sometimes pitched battles underground, occasionally lasting for days.

Some of the mines are worked exclusively to the more important mining of the district, but with the majority there are numerous proprietors, each employing from five to a score of men.

No great precautions are taken against the stealing of concentrates on the mines. This is done quite rarely. The punishment for it is death. The miners, smelters, ore-carriers, etc., all have their guild, protecting and having full powers for punishment over its members.

The somewhat socialistic customs mentioned are highly characteristic of China's internal government, here, in mining, being able to survive in this instance on account of the fact that this district occupied the civil war, and that absence of water underground, ease of mining and quick realisation of cash make the presence of large capital for tiding over lesser troubles non-essential.

Many of the mines are open-cast. In the richest of these the ore is washed on the spot with water from the artificial reservoirs, with the poorer, a special treatment is adopted. At the approach of the rainy season, the grass is rooted from the surface in favourable places and the ore-bearing ground is carried to the sides of reservoirs connected by means of canals with the mine. The water is then allowed to flow down the steep hill-side. When the reservoir is full, the ore is thrown in, and when a consistency of sludge is reached, the contents of the reservoir are allowed to pass into the canal. On the way down, water from the other reservoir is allowed to pass into the canal so as to assist the "run." Somewhere near the washing-floor the "run" of one passes into a series of short, parallel-walled, canal-like ponds arranged grid-wise. A considerable quantity of fresh water is here run in, so that the tin-stone slugs in the diluted sludge and the light waste can be run off with the water.

Concentration-tests on the ore of one mine show that 5 per cent. passes an 80 mesh, and that the overcast of the ore was the richest, so that a fair concentration is not difficult to obtain. The method of treatment of the concentrates from the operation is similar to that in use of the ore obtained from the underground and richer ore mines. It is first spread upon a hard floor and broken up with a wooden fork-like instrument. It is then treated in a rectangular, brick-lined baffle, in which it is reduced to a thin pulp with water and agitated with wooden rakes. The pebbles from a diameter of half an inch are raked up in the back of the baffle, and after the operation the suspended matter is allowed to run off into a settling-pond, whence the water can be pumped up again.

The concentrate remaining in the bottom of the baffle is usually divided into coarse and fine by screening or by washing round a settling hole. The coarse is kept for crushing at Kottien. The fines are washed by hand in wood-lined baffle.

These baffle all have the shape shown in the drawings, but differ much in size and also in the inclination of their faces. In this latter operation the ore is drawn a little at a time down the inclined face of the baffle, and a small jet of water is thrown over it by the dresser. A hard bed of concentrates is thus formed; this may be compared to a section from a Cornish circular baffle, and the light waste flows over this. Similarly the lowest part of the baffle is made to contain standing water, whose level is raised during the formation of the bed of the concentrate.

This treatment is repeated until the dresser has made the highest concentration possible, and the ore is then deposited in Kottien in bags. With fine concentrates the last stages are carried out in circular iron pans about 4 ft. broad and 1 ft. deep at the centre. The mineral is thoroughly stirred and then allowed to settle while the side of the pan is being tapped. Some idea of the complicated nature of the concentrating operations may be gained by the fact that in many cases the ore passes through 70 hands before most concentrates are ready for smelting.

Smelting.—The concentrates are smelted at Kottien in charcoal furnaces, of which drawings are given on p. 7. There are 29 of these at Kottien. The output of each is 12-15 slabs of 110 cabbies per day. The furnaces are, however, only in full working during November, December and January, as a rule. For seven or eight months of the year they are practically idle. Some of the men are used exclusively to smelt the ore obtained by their owners. The majority can be hired for smelting outside ore.

The construction of these furnaces is very simple, and the bricks being obtainable on the spot, they are not very costly to build. Two hundred pounds is stated to be approximately the cost of building furnace house and furnace. The blast is supplied by a wooden air-pump with piston packed with feathers, the usual instrument for providing blast in old Chinese forges and furnaces. Each furnace is run by 10 men (5 per shift) and a foreman.

Six-hour shifts are customary. Three men work at the blower, one man sees that the metal runs well from the tap-hole. One man is engaged in feeding in the ore and charcoal. In addition to these, there are two men engaged in pouring the metal. The slags from the furnace are crushed and washed to extract the metallic tin. The remainder is re-smelted with ore until considered free from tin. It is then dumped as conveniently as possible anywhere in the town.

There is no attempt at refining the metal at Kottien. The chief impurities are iron, often present to the extent of 1 per cent., and lead, usually less than a quarter of 1 per cent., though the metal from some of the mines may contain over 50 per cent. of lead.

During the last season, the size of the slabs into which the metal is cast has been changed to 21 1/2 in. by 8 1/2 in. from slabs twice the length,

which were cut into two to form a horse-charge. Each slab, before leaving Kottien, has to receive official "chops" or marks showing the slab has been weighed, and that the requisite taxes have been paid on it. When the slabs reach commerce, they usually also have been marked with the name of the furnace in which they were smelted, the merchant to whom they belong, and the transit agent through whose hands they have passed.

The miners pay no direct taxes to the Government. A small local tax is sometimes laid upon concentrates for the upkeep of the roads.

The bulk of the taxation is borne by the smelters, who have to pay taxes aggregating about 12.5 per cent. of metal value at present prices. The greater part of this tax is supposed to go to the maintenance of the standing army. A third of it is an indirect tax recently imposed by the former Viceroy of the Province, with the object of raising funds for the extension of the Yunnan Railway to the Yangtze. Each far the money he pays, but the value set upon concentrates is shown by the fact that these certificates are at present unmarketable. In addition to the above taxes, the metal pays per 133 1/2 lb. on exportation.

Practically all the tin is exported to Hongkong, where the greater part of it is refined by Chinese merchants for European consumption.

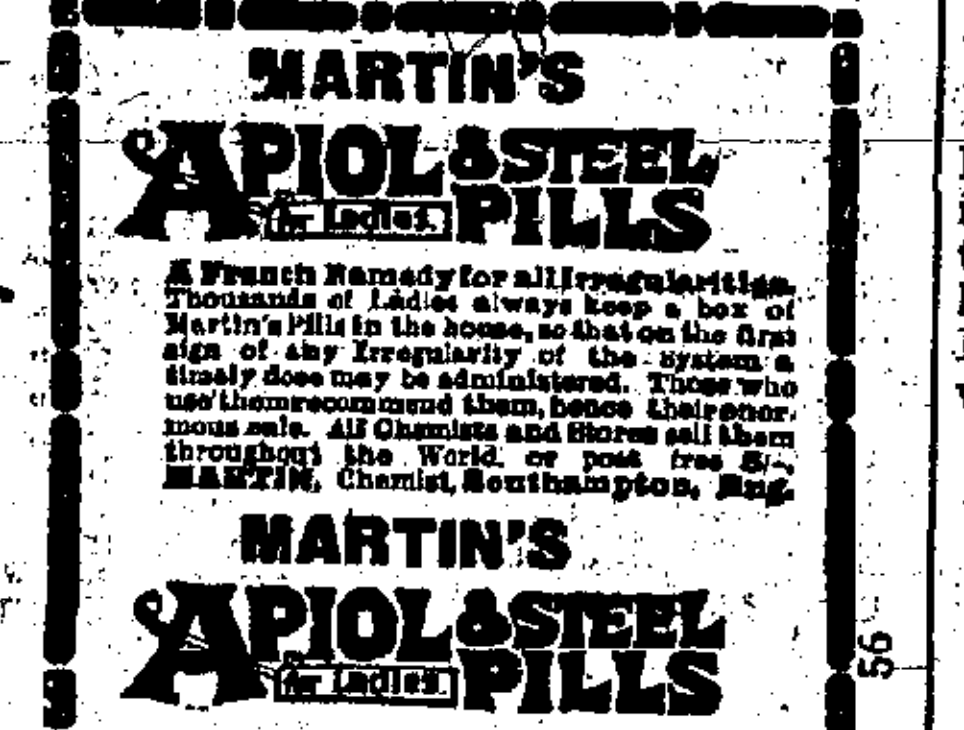

Statistical Points.—The output of metal during recent years has, roughly, kept pace with the increase in the world's production. Increased facilities of transport due to the building of the Haiphong-Yunnan Railway, which has now reached Mong-tse, and a cheapening in fuel, are likely to stimulate production. The cost of transport of the metal to the sea is but slightly reduced, though there is a great decrease in the risks borne by the merchants, who used to suffer considerable loss from robbery and the dangerous river transport previously necessary. The metal is still carried 30 miles on horseback to the railway.

The Chinese output of tin was, in 1903, considerably after its usual amount. The recent high prices have caused this to fall steadily till in 1906 that country consumed only a little over half the tonnage of this metal produced, the remainder being shipped to Europe. The Imperial Maritime Customs returns of tin exported may now be taken to be accurate, for transit otherwise than through the Customs is now prohibited, and there is probably not much smuggling of the metal inland.
